OBJECTIVE

Enthusiastic and detail-oriented Python Full Stack Developer with hands-on experience in Django, React.js. Skilled in frontend-backend integration, database optimization, and collaborative Agile environments. Passionate about creating scalable and efficient software solutions

TECHNICAL SKILLS & TOOLS

Languages — Python, JavaScript (ES6+)

Frameworks — Django, React.js

Web Technologies — HTML5, CSS3, Bootstrap

Databases — MySQL, PostgreSQL

Tools & Platforms — GitHub, Linux, Google Collab, Jupyter Notebook

PROJECTS

Meal Metrik, Tech used: Deep Learning, YOLOv8, Flask, Python

07/2024 – 05/2025

- Built an AI-powered diet tracking system using Flask and Python, enabling users to monitor daily calorie intake.
- Implemented YOLOv8 for Indian food recognition, improving detection accuracy by 20%.
- Designed a responsive HTML/CSS frontend for seamless user interaction.
- Integrated REST APIs to connect backend ML models with the web interface.

Big Mart Sales Prediction, Tech used: Machine Learning

07/2023 – 05/2024

- Developed an XGBoost-based predictive model to forecast sales across multiple stores.
- Deployed model using Flask, providing real-time prediction results.
- Analysed large datasets with Pandas and NumPy to identify key revenue patterns.

EDUCATION

St. John College of Engineering and Management, University of Mumbai, Bachelor of Engineering [Computer]

01/2022 – 05/2025

- CGPA: 7.4

Tarapur Vidya Mandir and Jr College, High School

08/2019 – 03/2021

- Percentage: 76.33

CERTIFICATIONS

Django Essentials — It Vedant (In progress)

Web Development Essentials — It Vedant (July 2025)

JavaScript — It Vedant (Aug 2025)

SQL Deep Dive — (Oct 2025)

React — It Vedant (Sep 2025)

Data Science — Testriq (Dec 2024)

Prompt Engineering and AI — Excelr (Dec 2024)

ACHIVEMENTS

Smart India Hackathon

01/12/2021

-Participation Award
